

## I'm tired of this game

G                      G/C    G  
All my questions one by one  
C        Am            D  
All my struggling nearly done  
G                      G/C    G  
All my anger all my shame  
          C    D        G  
I'm tired of this game

Em                C        G  
Emptiness is all I feel  
C                Am D  
Is there anything that's real  
          Em                C        G  
I've tasted all the fruits of life  
          C                Am        D  
But still can't get no rest.

          G                      G/C    G  
Oh where has all the promise gone  
C                Am        D  
Waiting till tomorrow comes  
          G                      C        D  
Today was tomorrow yesterday  
C                D                G  
Nothing seems to change

Em                      C        G  
Trading dreams of happiness  
C                Am        D  
All my plans are such a mess  
Em                      C                G  
Nothing works out how you dream  
C                Am        D  
Nothings how it seems

          G                      C        G  
I've looked for love and faithfulness  
          C                Am        D  
And found I wanted someone else  
          G                      C        G  
I am no better than I am  
          C                D        G  
A shadow of a man

Em                      C        G  
Don't know how much I can take  
C                Am        D  
All my smiling's just a fake  
Em                      C                G  
Is there any point at all

C            Am            D  
I'm ready for your call  
C            D            G            Em  
Oh are you listening are you there  
Am            D            G  
Are you really everywhere  
C            D            G            Em  
Can you really speak to me  
A                            D  
Can you help me see

G                            C            G  
All my questions one by one  
C            Am            D  
All my struggling nearly done  
G                            C            G  
All my anger all my shame  
C            D            Em  
I'm tired of this game  
Am            D            G  
I'm tired of this game
